Developed by RoadBuddy Team

Sprint 1 Report

Actions to Stop:

- Using Pyrebase library because we were having a lot of package issues.
- Focusing too much on the database structure.

Actions to Start:

- Implemented continuous integration (CI) on github to ensure everyone is following a standard style.
- Using Firebase admin python SDK.
- Documenting the design of database structure and the backend APIs in the README.md.

Actions to Continue:

- Setting up the communication link between the frontend and backend.

Completed Work:

- **#01: I, as a registered user, want the ability to login and logout as I wish.**
 - Design the outline of the login page
 - Design the logout button
 - Create login and logout APIs

Uncompleted Work:

- **#01: I, as an unregistered user, want to register for the service so I don't have to enter my information every time I use the service.**
 - Setting up the communication link between the frontend, backend, and database

Infrastructure:

- Frontend
- Backend
- Database
- Github
- Continuous integration
