RoadBuddy

Developed by **RoadBuddy Team**

Sprint 2 Report

Actions to Stop:
- Not merging to the main branch

Actions to Start:
- Merging to github
- Polishing frontend designs
- Completing features

Actions to Continue:
- Setting up the communication link between the frontend and backend.

Completed Work:
- **#03: I, as a driver, need to specify the amount of people I can take in my car so that other people can plan accordingly.[3 story points]**
  - Setup firestore storage
  - Create features for the ride offers
  - Create features for the ride request

Uncompleted Work:
- **#01: I, as a user, need to be able to make carpool offers and a request so that I can either get a ride or carpool buddy. [13 story points]**
  - Create carpool post offer creation page in react native
  - Create carpool post request creation page in react native

- **#02: I, as a user, need to be able to see carpool offers and requests so that I can either get a ride or carpool buddy.[8 Story points]**
  - Make it so other users can see the carpool requests
  - Create carpool offers page in react native

○ Create carpool rides page in react native

● **#04: I, as a driver, need to be able to cancel my ride offer so that if any emergency happens, people know that I can no longer drive.[2 story points]**
   ○ Delete Offer
   ○ Delete Request

Infrastructure:
- Frontend
- Backend
- Database
- Github
- Continuous integration

Burn-Up
